

TRACKER

Keep Your Equipment Safe And Under Control

Know where your equipment is.
Know how it's used. Anytime. Anywhere.

With the ALLU Tracker, you get real-time visibility into your equipment – helping you improve productivity, reduce misuse, and prevent theft.

Key Benefits:

Track Usage - Monitor running hours based on motion, giving you accurate data on equipment usage. Know exactly when service is needed or wear parts to be replaced with automatic service alarms.

Easy to Install - Compact (68 x 68 x 25 mm), lightweight, and magnet-mounted. No impact on equipment structure.

Rugged & Reliable - Built for the toughest conditions with IP69K protection. Field-tested and proven.

Always Connected - Works worldwide on GSM networks with LTE and 2G fallback. Logs data even when offline.

Accurate Positioning - Find your machines with built-in GPS or network triangulation.

Long Battery Life - Up to 5 years of power, no need for constant maintenance.

Online Management - Access your fleet data anytime through the ALLU Data Portal. Perfect tool to manage a rental fleet.
